SUMMARY

Software Engineer (SDE) with production experience shipping React Native and JavaScript features to millions of monthly active users on Myntra's (Flipkart Group) Search & Filters team; now Associate Software Engineer at Telstra. Full-stack breadth across Node.js, REST APIs, and Android (Kotlin, Jetpack Compose) with applied machine learning (TensorFlow, NLP, GenAI). Track record of measurable impact: +10.2% filter adoption and 88% database query-time reduction.

EXPERIENCE

Telstra — Associate Software Engineer | Bangalore, India | **Jul 2026 – Present**

- Building production software within Telstra's engineering organization, extending a foundation of consumer-scale mobile and web development (React Native, JavaScript, REST APIs).

Myntra (Flipkart Group) — SDE Intern, Search & Filters | Bangalore, India | **Jan 2026 – Jun 2026**

- Revamped the main product filters page serving millions of monthly active users (MAUs): converted the legacy filters page into a unified scroll layout with new icons, widgets, and API state handling across extensive edge cases — **increased overall filter adoption by 10.2%**.
- Shipped production-ready React Native and JavaScript code across the search-filters surface; **fixed 2 production bugs in the Product Listing Page (PLP)**.
- Performed Android performance profiling and built QA test automation; collaborated in agile sprints with product managers, designers, and backend engineers using A/B testing and feature flags at scale.

Alten Calsoft Labs — Software Development Intern | Bangalore, India | **Jun 2025 – Aug 2025**

- Optimized database query performance by **88% (60s → 12s)** through SQL indexing and query restructuring.
- Built data-extraction workflows processing hundreds of queries across enterprise databases in a 2-person agile team.

Centre for Innovation & Entrepreneurship (CIE), PES University — Tech Research Analyst | **Jan 2024 – May 2024**

- Fine-tuned Mistral 7B large language model (LLM) on medical datasets for healthcare natural language processing (NLP); deployed Gemini 2B locally via LM Studio with Open Interpreter.

PROJECTS

Aperture — Pro-Grade Android Camera App (Kotlin, Jetpack Compose, CameraX, Camera2) | 2026

- Built a full manual-control camera app: multi-frame RAW night stacking (8 aligned frames merged to one DNG), dual-camera simultaneous recording via GL compositor, slow-motion, panorama, and histogram/zebras/focus-peaking assists; runtime capability probing across OEMs; signed release build.

Smart Diet & Fitness Planner (React Native, Node.js, GCP, MongoDB, GenAI) | Capstone

- Developed AI-driven, calendar-aware health coaching app on HIPAA-compliant Google Cloud Platform (GCP) infrastructure; **published and presented at ICCET 2026, Chennai**.

HoneyShield — Honeypot Intrusion Detection System (IDS) (Python, TensorFlow, CATBoost)

- Trained machine learning models on 10,000+ network samples achieving **96% accuracy at 20–30 ms inference**; built FAISS-based threat pipeline with automated alerting.

SKILLS

Languages: JavaScript, TypeScript, Python, Kotlin, C, SQL, HTML/CSS

Mobile/Frontend: React Native, React, Next.js, Jetpack Compose, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST APIs, PostgreSQL, MongoDB, SQLite

ML/AI: TensorFlow, Scikit-learn, LangGraph, NLP, GenAI, Computer Vision

Cloud/DevOps: Google Cloud Platform (GCP), AWS, Azure, Docker, Git, CI/CD, Vercel, Linux

Security: Network Security, Penetration Testing, FAISS, CICFlowmeter

EDUCATION

PES University, Bangalore — B.Tech in Computer Science | **2022 – 2026** | **CGPA: 8.30/10.0** (10/10 GPA in Sem 7); DAC Scholar

Coursework: Data Structures & Algorithms (DSA), Machine Learning, Software Engineering, Cloud Computing, Cryptography, Computer Networks, Information Security, Large Language Models (LLMs)

PUBLICATIONS

K. R. Krishna et al., "Smart Diet and Fitness Planner: An AI-driven, Calendar-aware Mobile System for Holistic Health and Motivational Coaching." *ICCET 2026*, Chennai.

ACHIEVEMENTS

- State Hub Round — SAP Hackfest 2024 (12,500 participants); Top 10 — Terrathon 4.0 (270 participants).
- Vice-Head, Debate Society (led 15+ members); technical mentor in Data Science/Machine Learning; former state-level swimmer and chess player.
